

Ideation Phase

Brainstorm & Idea Prioritization Template

Team ID	SWTID-2026-5404
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we ensure incident records are saved with complete, valid data using UI Policies and Client Scripts?

Key rules of brainstorming

To run a smooth and productive session

😊 Stay in topic.

💡 Encourage wild ideas.

⏸️ Defer judgment.

👂 Listen to others.

🗣️ Go for volume.

👁️ If possible, be visual.

Selected problem statement:

How might we ensure Incident records are created with complete, valid and consistent data by enforcing conditional field behavior and save-time validation on the form?

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP
You can select a sticky note and hit the pencil (switch to select) icon to start drawing!

Amar	Yuktresh	Person 3	Person 4
1 2	3 4	5 6	7 8

Person 5	Person 6	Person 7	Person 8
9 10	11 12		

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Control field behavior based on Impact

- 1 Assignment group mandatory on High impact
- 2 Urgency read-only on High impact
- 6 Reverse if false reverts field changes

Automate updates and guide the user

- 3 Auto-set Urgency to High (onChange)
- 7 Info message when Urgency is auto-set
- 12 Inline error box on failing field

Validate data and block invalid saves

- 4 Block save if Assigned to empty (onSubmit)
- 5 Block State edit in list view (onCellEdit)

Add governance and backup checks

- 8 Server-side Business Rule as backup
- 9 Data Policy for imports and API
- 10 Dashboard for incidents missing data
- 11 Agent training on mandatory rules

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Idea Key

Implemented in project Future scope

- 1 Make Assignment group mandatory when Impact = High (UI Policy)
- 2 Make Urgency read-only when Impact = High (UI Policy action)
- 3 Auto-set Urgency to High when Impact changes to High (onChange script)
- 4 Block save when Assigned to is empty for High impact (onSubmit script)
- 5 Block State changes from the list view (onCellEdit script)
- 6 Enable 'Reverse if false' so fields revert when Impact is not High
- 7 Show info message: Urgency set to High for High impact incident
- 8 Add a server-side Business Rule as backup validation
- 9 Apply a Data Policy for imports and API-created incidents
- 10 Dashboard to monitor incidents with missing data
- 11 Train agents on mandatory-field rules and guidelines
- 12 Show an inline error box on the field that fails validation
