

Functional & Performance Testing Template

Model Performance Test

Team ID	SWTID-2026-5404
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Mandatory Field Validation (Assigned To on High impact)	Set Impact = High, leave Assigned To empty and click Submit	Save blocked; error shown on Assigned To	Save blocked; message "Assigned To is mandatory for High impact incidents." shown	Pass
FT-02	Field Behaviour on Impact Change (UI Policy)	Set Impact = High, then change to Medium	High: Assignment group mandatory, Urgency read-only. Medium: both reversed	High applied the rules; Medium reversed them (Assigned To optional, Urgency editable)	Pass
FT-03	Auto-population & List Edit Control (Client Scripts)	Set Impact = High; then double-click State in the Incident list	Urgency auto-set to 1 - High; list edit of State blocked with alert	Urgency set to High with info message; alert "State cannot be changed from the list" shown, State unchanged	Pass
FT-04	Form-Based Update & Script Activation Check	Fill Assigned To, Submit; update State on form and click Update	Record saves; State change allowed from the form	Incident saved successfully; State updated via form	Pass
PT-01	Response Time Test	Use a timer: change Impact and click Submit, note time to Urgency update / message	Should be under 3 seconds	Urgency update and validation message appeared within 3 seconds	Pass
PT-02	Repeated Save Speed Test	Submit several incidents in succession (High impact, with/without Assigned To)	Validation should not slow down	Validation stayed responsive across repeated submits	Pass
PT-03	List Edit Load Test (multiple incidents)	Try State edit on multiple incidents in the list view	Should block every attempt smoothly without crashing	Each attempt blocked with alert; list stayed stable	Pass
