

Project Development Phase
Performance Test

Team ID	SWTID-2026-5404
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	ServiceNow Incident table [incident]: list view and form records used for testing (e.g. INC0010012, INC0008111) with fields Number, Caller, Category, Impact, Urgency, Priority, State, Assignment group and Assigned to.
2.	Data Preprocessing	No data cleansing needed. Test data prepared directly on the Incident form: Impact set to 1 - High, 2 - Medium and 3 - Low; Assigned to left empty or selected (e.g. Beth Anglin) to validate the rules.
3.	Utilization of Filters	Filter conditions: UI Policy 'High Impact Control' runs on Impact is 1 - High; onChange script filtered on field Impact; onCellEdit script filtered on field State; Incident list filtered on Active = true.
4.	Calculation fields Used	Priority is system-calculated from Impact and Urgency (High/High = 1 - Critical; Medium/High = 2 - High). Script logic: newValue == '1' sets urgency = '1'. onSubmit check: impact == '1' and assigned_to == ''.
5.	Dashboard design	No of Visualizations / Graphs - 0 Native Incident form and list views only; no custom dashboard or report was built.
6	Story Design	No of Visualizations / Graphs - 0 Test evidence is documented as screenshots in Tasks 1 to 6 of the project.
