

Project Development Phase Model Performance Test

Team ID	SWTID-2026-5404
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Incident table records from the ServiceNow instance (Incident → All list view, showing 1 to 20 of 41 active records). 
2.	Data Preprocessing	No separate cleaning step; data quality is enforced at entry: Assignment group becomes mandatory and Urgency is auto-set to 1 - High (and made read-only) when Impact = High; Assigned To is validated on save; State edits from the list are blocked.
3.	Utilization of Data Filters	UI Policy condition filter: Impact is 1 - High. Incident list filtered to Active = true. 
4.	DAX Queries Used	Not applicable (no Power BI/DAX). Logic is written as ServiceNow client scripts: onChange (set Urgency), onSubmit (validate Assigned To), onCellEdit (block State list edit).
5.	Dashboard design	No of Visualizations / Graphs - 0 (no dashboard was built for this project)
6.	Report Design	No of Visualizations / Graphs - 0 (the Incident list view serves as the report; no charts)
