

User Acceptance Testing (UAT) Template

Team ID	SWTID-2026-5404
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Project Overview:

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: UI Policy and Client Scripts to enforce data integrity on Incident records

Project Version: 1.0

Testing Period: 14 January 2026 to 14 January 2026

Testing Scope:

UI Policy and UI Policy Actions; onChange, onSubmit and onCellEdit Client Scripts

Requirements: mandatory fields, auto-set Urgency, save validation, list-edit blocking

Testing Environment:

URL/Location: ServiceNow instance dev354432.service-now.com

Credentials (if required): Administrator login (credentials not included)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Assignment group is mandatory when Impact = High (UI Policy)	1. Go to Incident > Create New 2. Set Impact = 1 - High 3. Check Assignment group	Assignment group becomes mandatory	Assignment group marked mandatory	Pass
TC-002	Urgency is read-only when Impact = High (UI Policy Action)	1. Open an Incident form 2. Set Impact = 1 - High 3. Check the Urgency field	Urgency is read-only	Urgency is read-only (greyed out)	Pass
TC-003	Urgency auto-set for High impact (onChange script)	1. Open a new Incident 2. Change Impact to 1 - High 3. Observe Urgency	Urgency set to 1 - High automatically	Urgency set to 1 - High automatically	Pass
TC-004	Negative: save blocked without Assigned to (onSubmit script)	1. Create new Incident, Impact = High 2. Leave Assigned to empty 3. Click Submit	Record not saved; error shown on Assigned to	Not saved; 'Assigned To is mandatory for High impact incidents.'	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-005	Positive: save with Assigned to filled (onSubmit script)	1. Set Impact = 1 - High 2. Select a user in Assigned to 3. Click Submit	Incident saved without errors	Incident saved successfully	Pass
TC-006	State edit blocked in list view (onCellEdit script)	1. Go to Incident > All 2. Double-click State of a record 3. Try to change the value	Alert shown; State unchanged	Alert shown ('State cannot be changed from the list'); State unchanged	Pass
TC-007	Reverse if false: Assigned to no longer mandatory	1. Open Incident with Impact = High 2. Change Impact to 2 - Medium 3. Check Assigned to	Assigned to is not mandatory	Assigned to not mandatory	Pass
TC-008	Reverse if false: Urgency becomes editable	1. Open Incident with Impact = High 2. Change Impact to 2 - Medium 3. Check Urgency	Urgency is editable again	Urgency is editable	Pass
TC-009	Record saves after Impact is changed to Medium	1. Change Impact to 2 - Medium 2. Click Update 3. Verify the record	Record saved with no errors	Record saved with no errors	Pass
TC-010	State change from the Incident form is allowed	1. Open the same Incident 2. Set State = In Progress 3. Click Update	State change saved; other rules still apply	State updated to In Progress and saved	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Urgency stays 1 - High after Impact is changed from High to Medium (Priority recalculates to 2 - High)	1. Set Impact = High (Urgency auto-set) 2. Change Impact to 2 - Medium 3. Observe Urgency	Low	Closed	By design: onChange script only sets Urgency when Impact = High; Urgency is editable manually.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
